

GRAND THEFT AUTO

The Criminal Underworld TTRPG

NUMBER OF PLAYERS

This game is to be played by 2 players or 2 teams of players.

THE AIM OF THE GAME

You each play against each other as rival gangs slowly building up your wealth through doing missions. This money can be used to buy weapons, recruit Gang Members or to take on better paying Missions. Making sure to remove any opposing Gang Members you see along the way to maintain your own gangs power and control. Eventually you will have enough money to buy the “MAGIC 8-BALL” and using it to destroy your opponents hideout. Only once this has been done can the player start to permanently remove their opponents gang members. Gang Members killed Without a Hideout to return to are removed from the Game. Once the Enemy Hideout is destroyed and All remaining Enemy s have been killed the Player has Won the Game!

KEEPING TRACK OF GAME PROGRESS

It may be necessary for each player to use a notepad to keep track of all game events. (for example, number of steps taken, current mission progress, What “*Player Piece*” a Cop is targeting, what “*Weapon Card*” is Equipped to what “*Player Card*”, etc.) Although a “*Weapon Card*” will be known to all Players at time of purchase, each Player may choose to keep their “*Weapon Card*” hidden while not in a Battle Phase. “*Mission Card*”s however must remain visible and shown to opponent if requested so that Mission Completion can be verified.

PLAYERS TURNS

Each player will start their turn by rolling the dice which will determine a **Set Number of Squares** they can move for that turn, once they have finished carrying out Objectives/Tasks after and have use up all their Set Number of Squares their turn is over. **Players are free to use these steps how they choose.**

A Player is not limited by which “*Player Piece*” they move and may divide the set number of squares between different members of their gang to achieve multiple Objectives/Tasks in 1 turn. They can stop at any point to perform any tasks, Battle Phase, etc.

HOW TO MOVE ON BOARD

Each player will start with Their Player Piece at their Respective Gang Hideout Square. This will be a “*Player Piece: PEDESTRIAN*”. When Using a “*Player Piece: PEDESTRIAN*” the “*Footpath Squares*” must be used to count steps.

Road Squares can only be used as steps to get to the “*Footpath Squares*” directly opposite, the road counts as a step. A Footpath Square can only be occupied by 1 Player Piece at a time. To step on a Footpath Square occupied by an opponents Player Piece Battle Phase Must be entered to determine which piece will now occupy that square. If its a “*Player Piece*” belonging to the Player then they may jump this step without counting it to the square directly opposite.

When Using a “*Player Piece: VEHICLE*”: the road squares will be used to count steps. The Player inside a vehicle is safe from being targeted by a Battle Phase but may Target any “*Player Piece*” on the “*Footpath Squares*” surrounding their Road Square. Battle Phase will play out as it normally would. If a “*Player Piece: PEDESTRIAN*” is standing on a road square then they can be killed instantly if a “*Player Piece: VEHICLE*” steps onto that Road Square.

BATTLE PHASE

A Battle Phase is Entered When: a “*Player Piece*” selects a **Target** that is within range (Range = Number of Squares). Range can only be counted in straight lines but can include “*Road Squares*”. Players can only Target the other Player during their turn. There is no limit to the number of times a Player may Enter a Battle Phase per turn. Battle Phases are decided primarily by which Player has the highest Power Value, Range Value as a secondary factor.

If the Power Value of the Player is Higher than the Target: then the Target is killed and sent back to its respective “*Building Square*”.

If the Power Value of the Player is Lower than the Target: then the Targets Range Value will be checked and if the Target has a Range Value that is equal to or higher than the Player then the Player will be killed and sent back to its respective “*Building Square*”.

If the Power Value of each player is Equal: then a coin is flipped,
HEADS = BOTH KILLED
TAILS = BOTH SURVIVE

ENTERING A BUILDING

Each Player is assigned a Hideout which Can Only be used/stepped on by its Respective Owners. All other “*Building Square*”s are Neutral and are Open to both Players. A Player can choose to enter any “*Building Square*” by stepping on the “*Arrow Square*” in front of it. Going inside/outside of a “*Building Square*” from the “*Arrow Square*” counts as a step. There is no limit to how many “*Player Pieces*” can be inside any building at any given time. A player can stay in a building for as long as they choose and will exit by stepping onto the “*Arrow Square*”. If there are multiple doors to a building the player is free to enter/exit the building out of either door.

Buildings listed as Public: A Player may Enter/Exit a Public Building as many times as they choose by as many Players/ “*Player Piece*”s as they choose in the same turn. A Player is safe from being targeted by any “*Player Piece*” **outside** of the building. A Battle Phase can still be initiated by either Player/Team from within the “*Building Square*” if the Target shares that Square

Buildings listed as Private: cannot be occupied by 2 opposing Players at the same time. Any player must wait for it to be empty before they may gain entry
When entering a Private building the Players turn is over!

WEAPON CARDS

When there is no “*Weapon Card*” Equipped then the Values of the “*Initial Equipment*” on the “*Player Card*” are applied. Any “*Player Card*” can Equip a “*Weapon Card*”, most of which can be purchased at “*GUN STORE KENDO*”.

There is limited stock so 1st come 1st served. Each “*Player Piece*” can only Equip 1 Weapon Card at a time and must return any previously Equipped card when buying a new 1.

SECONDARY WEAPON CARDS

These “*Weapon Card*” may be Equipped by a Player as well as a Weapon Card and it may be played at any time or kept unused for any amount of time it is as

the name implies, a secondary Weapon. All Secondary “*Weapon Card*” can be used only once by a player and must return to its respective Deck after use.

MAGIC 8-BALL WEAPON CARD

This card is limited to 1 per Player. This Card can only be Equipped by the Main Player Cards and not by any recruited “*Player Piece*”s. This Weapon Card cannot be removed from a Player Card Once Equipped and is not affected by normal Game Conditions.

The “MAGIC 8-BALL” is an end of Game card used only to destroy the opponents Hideout. This is Necessary to remove the opponents ability to keep a “*Player Piece*” that is killed, which in turn, makes it possible to remove all Opposing “*Player Piece*”s from the Board, ending the Game.

To use the “Weapon Card: MAGIC 8-BALL” the “*Player Piece*” with it Equipped must step on the “*Arrow Square*” to the opposing Players “*SAFEHOUSE*”.

Once successfully using this Card the Opponents “*HIDEOUT*” is no longer in Play and that “*Building Square*” will now be treated as a “*DEAD-ZONE*”. Any “*Player Piece*” that is sent to a “*DEAD-ZONE*” will now be removed from play for the rest of the Game

MISSION CARDS

A “*Player Piece*” Can, if they choose, Start a Mission by standing on the “*Arrow Square*” in front of a “*Mission Card*” Placeholder and drawing the top card and attaching to its relevant “*Player Card*”. This “*Mission Card*” will be kept until its either Completed or Failed. A “*Mission Card*” cannot be replaced with a new “*Mission Card*”. Some Missions cost money to be started but also have a better payout. The “*Player Piece*” **Does Not** need to step into the building to draw a “*Mission Card*” but they can if they choose to.

If the card is is drawn without entering the building: then it is not the end of their turn and they can continue their Steps.

If the card is is drawn when entering the building: then the Players turn ends but they have the benefit of being in a “*SAFE-ZONE*”

To Complete A Mission: all tasks must be competed on a Equipped “*Mission Card*” by its respective holder and upon completion the player will be paid the amount on card. The card is then returned to the bottom of its respective deck.

If a Mission Card holder is killed/Arrested: then the Mission is failed and the “*Mission Card*” is Returned to the bottom of its respective deck.

Continuing a Failed Mission: The Player has the option to continue the failed “*Mission Card*” from its current progress by moving it to another “*Player Card*” This can only be passed on to a Player with no “*Mission Card*” attached.

How to Forfeit a Mission: There may be situations where a Player is unable to complete a Equipped “*Mission Card*”. The player may forfeit a Equipped “*Mission Card*” by simply walking into the “*POLICE STATION*” and Handing yourself in. The Player will be arrested by police and this would play out as it normally would.

1520 SEDGWICK AVENUE

“1520 SEDGWICK AVENUE MISSION CARDS” offer an alternative route to winning the game. Taking this path , however, will prove to be harder as there is little to no payout for completing Missions. Unlike all other “*Mission Cards*” these will not be returned to the Deck when completed, but instead, are removed from play. These Mission Cards are split into 3 levels.

Level 1 “1520 SEDGWICK AVENUE MISSION CARDS” are available to both Players and upon completion the Player will keep these Mission Cards that they complete to determine who will be continuing down this path. When all Level 1 Mission Cards have been completed then both Players will count how many of these Mission Cards each Player holds and whoever has the most will have won the rights to Level 2.

Level 2 “1520 SEDGWICK AVENUE MISSION CARDS” will be used when ALL Level 1 cards have been removed from Play. Only the Player who won the rights to Level 2 Mission Cards may take on these Mission Cards for the Rest of the Game. Again these Mission Cards will be removed from play instead of returning to the Deck and again only when there are no more Level 2 Mission Cards may the final Level 3 Mission Card be Held.

Level 3 “1520 SEDGWICK AVENUE MISSION CARDS” operates much like the “**MAGIC 8-BALL**” except that it is not Single use and will be used to destroy both Players Safehouse. When using this card the normal conditions for Victory will have changed and the Player will now have to destroy both Players safehouses as well as removing all opposing Player Pieces from the Game. **THE PLAYER MUST DESTROY THEIR OWN SAFEHOUSE FIRST, ONLY THEN CAN THEY REMOVE THE OPPONENTS SAFEHOUSE!** The Normal Conditions for Victory will not be available to the player who used this card and the new conditions of destroying both Players Safehouse will be required instead.

CHAOS CARDS

“CHAOS CARDS” consist of 2 mandatory Decks “**A WALK IN THE PARK**” & “**DARK ALLEYWAY**” as well as a 3rd Out of Play Deck “**ALLEY TO THE VALLEY OF SHADOWS**”. There is **No Limit** to the number of times the Player can draw these cards in a single turn

A WALK IN THE PARK

70/30 chance of a Bonus or Penalty both of less significant impact.
The Entire Park is counted as a “*Building Square*” but is Unique in that it has “*Footpath Squares*” within it. The “*Player Piece*” will use these “*Footpath Squares*” inside the “*Building Square*” as they normally would, but will be considered as being inside “*Building Square: THE PARK*”. The Footpath within “*THE PARK*” is a 1-Way system, meaning, The Player can freely enter through both “*Arrow Square*”s, *but* cannot Exit through the same “*Arrow Square*” that was used to Enter.

DARK ALLEYWAY

25/75 chance of a Bonus or Penalty both of significant impact.
This Alleyway serves as a Short-cut when navigating across the board but may also turn out to be a Long-cut so take at your own risk.

ALLEY TO THE VALLEY OF SHADOWS

This Deck is NOT normally in play but may be added at the start of game only! This Deck isn't intended to be a get rich quick scheme and should not be in play if used as such! This is intended to act as a fail-safe for those who are losing and are want to quit....

**50/50 chance of losing the game (To their relief) or getting \$100,000
(Possibly making them want to try and turn the game back round)**

RECRUITING GANG MEMBERS

Each Player can Hire A New Recruit: by entering the various “*SOCIAL HANGOUTS*” and paying the set price of a “*Player Card*”. That Player will now control that “*Player Piece*” and can use it to carry out their own missions, etc.

The Recruit Becomes a Permanent Gang Member: after the player has successfully completed a “*Mission Card*” with that recruit.

If a new recruit is killed: before completing a Mission then it will be sent back to its Respective Location and any Equipped “*Weapon Card*”s are removed.

If a Permanent Gang Member is killed: they are sent back to the respective Players Hideout. They do not lose their Equipped “*Weapon Card*” when killed.

“Player Card: GENERIC JUNKY” is Unique in that it can Not become a Permanent “*Player Piece*” and will always be sent back to Pub A when killed. When this card is arrested it is treated as being killed. On top of that he can only purchase Melee “*Weapon Card*”. These “*Weapon Card*” will Remain Equipped by this card even when killed and can only be removed by replacing it with a new “*Weapon Card*” (Permitted “*Weapon Card*” will be listed on the “*Player Card*”)

CASINO RULES

Any player can gamble up to \$10,000 at a time. The opposing player flips a coin and if the player calls it they double their money. If called correctly that player can choose to bet again. This may be repeated until its called wrong.

POLICE TURNS

A “*POLICEMAN*” will be dispatched whenever a “*Mission Card*” implies. Its “*Player Piece*” will start from inside the “*Building Square: POLICE STATION*”. This role will be taken on by the Opposing Player as a Separate Turn to be taken before their own turn. A “*POLICEMAN*” can only target the

“Player Piece” associated with that *“Mission Card”* , however, Any *“Player Piece”* can target a *“POLICEMAN”*. Battle Phase plays out as it normally would. In addition, they are able to arrest a *“Player Piece”* by standing on their Square.

If the POLICEMAN kills its Target: then the *“Mission Card”* holder and is sent back to their respective Location.

If the POLICEMAN Arrests the Mission Card Holder: then the card holder has failed the mission and both *“Player Piece”*s are sent to the *“POLICE STATION”*. When a *“Player Piece”* is arrested any Equipped *“Weapon Card”* is Seized and sent back to its respective deck. When a *“Player Piece”* is arrested it will remain inside the *“POLICE STATION”* for 3 turns (only the *“Player Piece”* in jail is unable to move). The player will have the option to pay \$5,000 bail so they can keep their *“Weapon Card”* and be sent to their *“SAFEHOUSE”* instead.

If the POLICEMAN is killed: then its *“Player Piece”* is sent back to the *“POLICE STATION”*. A new *“POLICEMAN”* will be dispatched on its following turn and this will continue until the associated *“Mission Card”* is returned to its deck.

BUILDING SQUARES
